SESSIONS

Stream A
GENETIC ENGINNERING

NANOTECH, BIOSENSORS & GENETIC ENGINEERING IN AGRO-VET

Sub-session 1: Nanotechnology Applications in Agro-Vet Systems

- Nanomaterials for Pest and Disease Control
- Nanotechnology for Precision Agriculture
- Smart Delivery Systems for Agrochemicals Using Nanotech
- Nanosensors for Environmental Monitoring in Agriculture
- Nanotechnology for Soil Fertility and Plant Growth Enhancement

Sub-session 1: Genetic Engineering for Improved Animal and Crop Health

- Gene Editing for Disease Resistance in Crops
- CRISPR Technology in Livestock Health Improvement
- Transgenic Crops for Increased Nutritional Value
- Genetic Engineering for Stress Tolerance in Livestock
- Molecular Breeding for Enhancing Animal Productivity

SESSIONS

Stream B
PRECISION (AI) BASED AGRO-VET

ARTIFICIAL INTELLIGENT TECHNOLOGIES FOR AGRO-VET SUPPLY CHAIN

Sub-session 1: Optimizing Supply Chains with Smart Technologies

- Blockchain for Agro-Vet Traceability
- Artificial Intelligence for Demand Forecasting in Agro-Vet
- IoT-Driven Real-Time Supply Chain Management
- Smart Warehousing Solutions in Agro-Vet Supply Chains
- Automated Inventory Management with AI and Robotics

Sub-session 2: Digital Tools for Agro-Vet Logistics Efficiency

- Geospatial Mapping for Efficient Farm Logistics
- Drones for Livestock and Crop Monitoring
- AI-Based Route Optimization for Transportation
- Cloud-Based Platforms for Agro-Vet Supply Chain Coordination
- Robotics in Packing and Shipping Agro-Vet Products

SESSIONS

Stream B
PRECISION (AI) BASED AGRO-VET

INTEGRATING SMART TECHNOLOGIES FOR CLIMATE-SMART AGRO-VET

Sub-session 1: Transforming Agro-Vet Industries with Automation

- Robotics for Automated Livestock Handling and Care
- AI-Powered Automation in Crop Production
- Automated Feeding Systems for Livestock
- Machine Vision for Quality Control in Agro-Vet Products
- Farm Management Automation with IoT Integration

Sub-session 2: Enhancing Agro-Vet Practices through Digital Innovations

- Telemedicine and Remote Veterinary Services
- Virtual Reality in Veterinary Education and Training
- Digital Platforms for Real-Time Crop and Livestock Monitoring
- Wearable Devices for Animal Health Monitoring
- Mobile Applications for Veterinary Care and Consultation

SESSIONS

Stream C
AGRO-VET PRENEURSHIP & POLICY ECONOMICS

DATA-DRIVEN POLICY DEVELOPMENT IN AGRO-VET

Sub-session 1: Shaping Agro-Vet Policies with Advanced Analytics

- Big Data and AI for Policy Decision Making
- Predictive Analytics for Agro-Vet Policy Planning
- Role of Machine Learning in Policy Design for Agriculture
- Data-Driven Solutions for Sustainable Agro-Vet Practices
- Modeling and Simulation for Agro-Vet Policy Impact Assessment

Sub-session 2: Regulatory Frameworks for Emerging Agro-Vet Technologies

- Ethical and Legal Implications of Biotechnologies in Agro-Vet
- International Regulations for Genetic Engineering in Agriculture
- Compliance Standards for AI and Automation in Agro-Vet
- Policy Challenges in Regulating Smart Agro-Vet Solutions
- Setting Standards for AI-Driven Veterinary Diagnostics

SESSIONS

Stream C
AGRO-VET PRENEURSHIP & POLICY ECONOMICS

ENTREPRENEURSHIP IN AGRO-VET INNOVATION

Sub-session 1: Starting and Scaling Agro-Vet Startups

- Identifying Market Gaps in the Agro-Vet Sector
- Funding Strategies for Agro-Vet Entrepreneurs
- Building a Sustainable Agro-Vet Business Model
- Regulatory Challenges for Agro-Vet Startups
- Networking and Collaboration for Startups in Agro-Vet

Sub-session 2: Innovation and Technology in Agro-Vet Entrepreneurship

- Leveraging Technology for Agro-Vet Business Growth
- Disruptive Innovations in Agro-Vet Industries
- AI and Data-Driven Startups in the Agro-Vet Space
- Technology-Enabled Solutions for Rural Entrepreneurs
- Successful Case Studies of Agro-Vet Startups

SESSIONS

Stream D
GENDER MAINSTREAMING IN AGRO-VET

AI DRIVEN WOMEN EMPOWERMENT IN AGRO-VET

Sub-session 1: AI-Powered Solutions for Women in Agriculture: Bridging Gender Gaps in Farming Communities

- Leveraging AI for Precision Farming: Empowering Women Farmers with Smart Technologies
- Reducing Gender Inequality in Resource Access: AI's Role in Land Ownership, Financing, and Education
- Improving Labor Efficiency: AI Solutions to Alleviate Women's Burden in Manual Farming
- AI and Crop Prediction: Enhancing Food Security and Women's Livelihoods
- Inclusive AI Platforms: Tailoring Agro-Tech Solutions for Women Farmers

Sub-session 2: Empowering Women Agripreneurs through AI: Business Development, Policy, and Access to Resources

- AI-Driven Agribusiness Models: Creating Opportunities for Women Entrepreneurs
- AI for Market Access: Enabling Women to Reach Global Agricultural Markets
- Financial Inclusion: AI and Access to Microfinance for Women in Agriculture
- The Role of AI in Gender-Responsive Policy Making for Women Agripreneurs
- Women's Leadership in Agri-Tech: AI as a Tool for Breaking Gender Barriers in Agricultural Innovation
